## Projects

### Inventory Management System

The Inventory Management System is a Java-based application with a MySQL database that performs CRUD operations for managing products, categories, and stock. It features two roles: Admin, who can add, update, delete, and manage inventory, and User, who can view product details and check stock availability, ensuring efficient and secure inventory management.

### Home-Decor Website

A stylish Home-Decor website built with HTML, CSS, Bootstrap, and JavaScript featuring home and garden décor products. Includes an add-to-cart feature.

### To-Do List

A simple task manager built with React that lets you add and delete tasks, along with a fun feature to add a random emoji with a single click for a playful experience.

### Grocery Website

A responsive grocery website built using React and Tailwind CSS, featuring three main categories: Fruits-Vegetables, Dairy & Eggs , Meals.
